 $\label{lem:condition} \end{center} \end{center} \begin{center} \cite{Allocal@devOps:-/leantime_ansible-linton} \end{center} \begin{center} \cite$ molecule/default/verify.yml

Loading custom .yamllint config file, this extends our internal yamllint config.

WARNING Listing 1 violation(s) that are fatal

syntax-check: Ansible syntax check failed molecule/default/verify.yml:0 [WARNING]: provided hosts list is empty, only localhost is available. Note that

the implicit localhost does not match 'all'

ERROR! Syntax Error while loading YAML.

did not find expected '-' indicator

The error appears to be in '/home/admlocal/leantime\_ansible/molecule/default/verify.yml': line 38, column 2, but may be elsewhere in the file depending on the exact syntax problem.

The offending line appears to be:

- name: "Teste: a cache encontra-se atualizada?"

^ here

This one looks easy to fix. It seems that there is a value started with a quote, and the YAML parser is expecting to see the line ended with the same kind of quote. For instance:

when: "ok" in result.stdout

Could be written as:

when: "ok" in result.stdout

Or equivalently:

when: "'ok' in result.stdout"

You can skip specific rules or tags by adding them to your configuration file:

# .ansible-lint

warn list: # or 'skip list' to silence them completely

- syntax-check # Ansible syntax check failed

Finished with 1 failure(s), 0 warning(s) on 1 files.
